

Del Carmen Natural Slate Roofing

About SSQ

Established in 1983, the SSQ Group is one of the world's leading quarriers and suppliers of high-grade, unfading natural slate for roofing and architectural applications. From our headquarters in London we provide natural slate to over twenty countries, with North America and Europe being our principal markets. Find out more at: www.ssqslate.com

Product profile

SSQ Del Carmen Slate is mined at one of the largest quarries in north-west Spain. The quarry is located in the Cabrera mountains, an area that contains uninterrupted seams of high-quality slate.

In addition to passing SSQ's own, rigorous quality-control tests, SSQ Del Carmen roofing slate has been tested in accordance with ASTM American Standard and has achieved the highest grade S1. Del Carmen also surpasses the rigorous Norm Francais (NF 228), which is the world's highest standard for natural slate roofing.

Appearance

SSQ Del Carmen roofing slate has a distinctive riven texture; the deep blue-black color is totally natural and will not fade, even in the strongest sunlight. This slate is totally devoid of any surface inclusions, such as pyrites and is therefore guaranteed not to rust.

Guarantee

You should never have to bear any risk when you're choosing what to put on your roof. That's why we take on all the risk and guarantee your Del Carmen roof for up to 100 years.

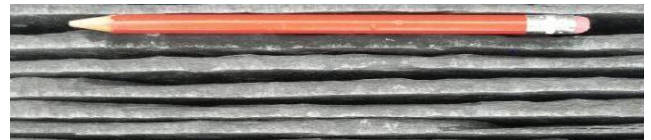

Sizes, pieces per square and exposure

Imperial inches	Metric cm	Pcs per square	Exposure at 3" lap
24 x 12	60 x 30	115	10 1/2"
